Index to
JOURNAL OF APPLIED MECHANICS

Volume 25, 1958

The Journal of Applied Mechanics includes papers contributed to the Transactions of the ASME by the Applied Mechanics Division of the ASME. The Journal of Applied Mechanics for 1958 was issued quarterly in March, June, September, and December.

Issue	Page Numbers
March	1–164
June	165–324
September	325–420
December	421–644

A

ABBASSI, MOHAMMED M.
Buckling of struts of variable bending rigidity 537

ABRAMSON, H. NORMAN (author)
Introduction to the dynamics of airplanes (BR) 643
Study of the propagation of flexural waves in elastic beams (AC) 154

ACCELERATION. *See* KINEMATICS

ACCELEROMETERS
Design of accelerometers for transient measurements 509

AERODYNAMICS
New approach to the theory of thin, slightly cambered profiles (D) 148
Simple approach to an approximate two-dimensional cascade theory 607

AIRPLANES
Introduction to the dynamics of airplanes (BR) 643

ANALOGY. *See* PHOTOELASTICITY

ANCKER, C. J., JR.
Pitch and curvature corrections for helical springs 466
Theory of pitch and curvature corrections for the helical spring —I (tension) 471
II (torsion) 484

ANTIFRICTION BEARINGS. *See also* CYLINDERS
Effect of a tangential contact force upon the rolling motion of an elastic sphere on a plane 339
Effect of spin upon the rolling motion of an elastic sphere on a plane 332
Influence of Kapitsa's viscosity on the hydrodynamic lubrication of a cylindrical roller bearing as affecting contact pressure and oil-film thickness 620

APPLIED MECHANICS
Abstracts of papers of the Third U.S. National Congress of Applied Mechanics 165
Effect of a tangential contact force upon the rolling motion of an elastic sphere on a plane 339
Effect of spin upon the rolling motion of an elastic sphere on a plane 332
Forced lateral oscillations of trailers (D) 308

ARCHIBALD, F. R.
Vibration of a string having a uniform motion along its length 347

ARNOLD, F. R.
Forced vibration of systems with non-linear, nonsymmetrical characteristics (D) 305

ARONOFSKY, J. S.
Physics of flow through porous media (BR) 320

ATKINSON, C. P.
Superharmonic oscillations as solutions to Duffing's equation as solved by an electronic differential analyzer (AC) 316

AUTOMATION
Automation in business and industry (BR) 323

B

BAILEY, J. J.
Type of flame-excited oscillation in a tube (AC) 307

BARBER, A. D.
Dynamic response of beams and plates to rapid heating (AC) 310

BARFIELD, B. F.
Laminar flow in a uniformly porous channel 613

BARTON, M. V.
Some shock spectra characteristics and uses 365

BASBALL, W. A.
Bending of an elastically restrained circular plate under normal loading over a sector 37, 638

BATDORF, S. B.
General instability of a ring-stiffened, circular cylindrical shell under hydrostatic pressure (D) 152

BEAMS. *See also* COLUMNS
Approximate analysis of Timoshenko beams under dynamic loads 31
Bending frequency of a rotating cantilever beam 28
Bending of pretwisted thin-walled beams of symmetric star-shaped cross sections 67
Coupled vibrations of thin-walled beams of open cross section 373
Dynamic response of beams and plates to rapid heating (D) 309
Formulas for the frequencies including higher frequencies of uniform cantilever and free-free beams with additional masses at the ends 412
Interaction curves for shear and bending of plastic beams (D) 304
Large deflection of thin circular cantilever beams 294
Natural frequencies of nonuniform beams on multiple elastic supports 57
Photoelastic study of maximum tensile stresses in simply supported short beams under central transverse impact (D) 305
Plastic deformation due to impact of a cantilever beam with an attached tip mass 515
Response of a simply supported Timoshenko beam to a purely random Gaussian process 496
Some solutions of the Timoshenko beam equation for short pulse-type loading 379
Specific damping energy of fixed-fixed beam specimens (D) 152
Study of the propagation of flexural waves in elastic beams (D) 153

BEARINGS
Effect of lubricant inertia in journal-bearing lubrication (D) 420
Elastic and damping properties of oil-film journal bearings for application to unbalance vibration calculations 141

BECKENBACH, EDWIN F. (author)
Modern mathematics for the engineer (BR) 644

BECKER, HERBERT
General instability of ring-stiffened cylindrical shells subject to external hydrostatic pressure—a comparison of theory and experiment (D) 640

BEGGS, J. S.
A theorem in plane kinematics 145

BERS, LIPMAN
Jets, wakes, and cavities (BR) 319

BESSELING, J. F.
Theory of elastic, plastic, and creep deformations of an initially isotropic material showing anisotropic strain-hardening, creep recovery, and secondary creep 529

BETSER, A. A.
Photoelastic study of maximum tensile stresses in simply supported short beams under central transverse impact (AC) 306

BINGHAM PLASTIC. *See* STRESSES AND STRAINS

BIRKHOFF, G. (author)
Jets, wakes, and cavities (BR) 319
Water waves (BR) 643

BISPLINGHOFF, R. L.
Introduction to the dynamics of airplanes (BR) 643

BLADES. *See* COMPRESSORS, ROTORS, TURBOMACHINERY

BLAND, D. R.
Compressible elastic, perfectly plastic wedge 239

BOILERS
Failure of structural units; a technical report (BR) 163

BOLEY, B. A.
Approximate analysis of Timoshenko beams under dynamic loads 31
Dynamic response of beams and plates to rapid heating (AC) 310

BOOK REVIEWS
Automation in business and industry 323
Behavior of metal at elevated temperatures 324
Brittle behavior of engineering structures 322
Centrifugal and axial flow pumps 164
Digital computer programming 320
Failure of structural units; a technical report 163
Heat transfer. Volume II 321
Introduction to fluid mechanics and heat transfer 644
Introduction to the dynamics of airplanes 643
Jets, wakes, and cavities 319
Mathematics and computers 644
Modern mathematics for the engineer 644
Nuclear engineering 163
Physics of flow through porous media 320
Praktische Mathematik für Ingenieure und Physiker (BR) 162
Process instruments and controls handbook 321
Rheology theory and applications. Volume 1 162
Spectroscopy of flames 323
Strength of materials 322
Strömungsmachinen 162
Thermal stresses 321
Water waves 643

BOUNDARY LAYER. *See* FLOW OF FLUIDS

BRAKES
Some basic properties of shoe brakes 7
Some basic properties of shoe brakes (D) 633

BRATT, J. F.
Effect of tensile plastic deformation on yield condition 411

BRULL, M. A.
Dynamic response of beams and plates to rapid heating (D) 309

BUCKLING
Axially symmetric buckling of shallow spherical shells under external pressure 556
Buckling of a thin annular plate under uniform compression 267
Buckling of rectangular plates with two unsupported edges (D) 420
Buckling of struts of variable bending rigidity 537
General instability of a ring-stiffened, circular cylindrical shell under hydrostatic pressure (D) 152
Symmetrical buckling of a series of uniformly loaded parallel struts supported by spot connections to a long thin plate (D) 417

(AC) denotes Author's Closure; (BR) Book Review; (D) Discussion of a paper.

BUHLER, R. D.
Two-dimensional inflow conditions for a supersonic compressor with curved blades (D) 149

BURSTING TESTS
Bursting pressure of cylindrical and spherical vessels ..... 89,(D) 628

C

CANNON, R. H., JR.
Kinematic drift of single-axis gyroscopes. 357

CARTER, W. J.
Second acceleration in four-bar mechanisms as related to rotopole motion.... 293
Torsion and flexure of slender solid sections 115
Velocity and acceleration analysis of plane and space mechanisms by means of independent-position equations (D) 636

CASCADES. *See* AERODYNAMICS, FLOW OF FLUIDS

CAUGHEY, T. K.
Superharmonic oscillations as solutions to Duffing's equation as solved by an electronic differential analyzer (D)..... 315

CAVITATION
Photoelastic study of strain waves caused by cavitation (D)..... 298

CHAO, CHI-CHANG
An approximate analysis of Timoshenko beams under dynamic loads..... 31

CHATTERJEE, B. B.
Stresses in a dumbbell-shaped disk rotating about an axis lying in its middle plane..... 290

CHERRY, T. M.
Point source and point vortex in the hodograph plane (D)..... 150

CLARK, J. W.
Specific damping energy of fixed-fixed beam specimens (AC)..... 152

CLARK, S. K.
Transient thermal stresses by an analogy. 627

COCHARDT, A. W.
Specific damping energy of fixed-fixed beam specimens (D)..... 152

COHEN, HIRSH
Two-dimensional, steady, cavity flow about slender bodies in channels of finite breadth (AC)..... 156

COLE, J.
Stresses produced in a half plane by moving loads..... 133

COLUMNS
Creep deflections and stresses of beam-columns..... 75

COMBUSTION
Spectroscopy of flames (BR)..... 323
Type of flame-excited oscillation in a tube (D)..... 306

COMPRESSORS
Two-dimensional inflow conditions for a supersonic compressor with curved blades (D)..... 149

COMPUTERS
Digital computer programming (BR)..... 320
Mathematics and computers (BR)..... 644

CONSIDINE, DOUGLAS M. (editor)
Process instruments and controls handbook (BR)..... 321

CONWAY, H. D.
Levy-type solution for a rectangular plate of variable thickness..... 297
Nonaxial bending of ring plates of varying thickness..... 386

COOPER, R. M.
Cylindrical shells under line load (AC)... 318

CORNELL, W. G.
Two-dimensional, steady, cavity flow about slender bodies in channels of finite breadth (D)..... 155

COUPLINGS
On the dynamical behavior of rotating shafts driven by universal (Hooke) couplings..... 47

CRANDALL, S. H.
Improvement of Holzer table based on a suggestion of Rayleigh's (AC)..... 161
Negative group velocities in continuous structures (AC)..... 307

CRANKS. *See* MECHANISMS

CREDE, C. E.
Effect of product of inertia coupling on the natural frequencies of a rigid body on resilient supports..... 541

(AC) denotes Author's Closure; (BR) Book Review; (D) Discussion of a paper.

CREEP OF MATERIALS. *See also* STRESSES AND STRAINS, THERMAL STRESSES
Further studies of stress distribution in rotating disks and cylinders under elevated-temperature creep conditions. 243
Theory of elastic, plastic, and creep deformations of an initially isotropic material showing anisotropic strain-hardening, creep recovery, and secondary creep 529
Torsion of cylindrical and prismatic bars in the presence of steady creep..... 214

CRITICAL SPEEDS. *See* SHAFTS

CUTCLIFFE, J. L.
Symmetrical buckling of a series of uniformly loaded parallel struts supported by spot connections to a long thin plate (AC)..... 417

CYLINDERS. *See also* ROTORS, SHELLS
Effect of curvature on the Hertz theory for two circular cylinders in contact..... 122,(D) 658
The end problem of cylinders..... 561
Reflection of an acoustic step wave from an elastic cylinder..... 103
Stresses in a thick cylinder having a square hole under concentrated loading 571

D

DALLY, J. W.
New method to "lock-in" elastic effects for experimental stress analysis..... 189

DAMPING. *See* VIBRATION

DAWOUD, R. H.
Bending of an elastically restrained circular plate under normal loading over a sector..... 37, 638

DEFORMATION. *See also* PLASTICITY, SHELLS, SPRINGS
Bursting pressure of cylindrical and spherical vessels..... 89,(D) 628
Pressure for indenting material resting on a rough foundation..... 64
Theory of elastic, plastic, and creep deformations of an initially isotropic material showing anisotropic strain-hardening, creep recovery, and secondary creep..... 529

DERESIEWICZ, H.
Stress-strain relations for a simple model of a granular medium..... 402

DESIGN DATA AND METHODS
Elastic and damping properties of oil-film journal bearings for application to unbalance vibration calculations..... 141
Uniformly loaded circular plates with a central hole and both edges supported (D)..... 157

DIFFERENTIAL EQUATIONS. *See* MATHEMATICS

DIFFUSERS
Effect of adverse pressure gradients on turbulent boundary layers in axisymmetric conduits (D)..... 159

DIMENSIONAL ANALYSIS. *See* MATHEMATICS

DISKS. *See* ROTORS

DI TARANTO, R. A.
Blade-vibration-damping device—its testing and a preliminary theory of its operation..... 21
Natural frequencies of nonuniform beams on multiple elastic supports..... 57

DRUCKER, D. C.
Behavior of metals at elevated temperature (BR)..... 324
Thermal stresses (BR)..... 321

DRUMMOND, W. R.
Comments on the cutting of metal plates with high explosive charges..... 184

DUNN, E. L.
Statistical appraisal of Prot method for determination of fatigue endurance limit (D)..... 156

DURELLI, A. J.
New method to "lock-in" elastic effects for experimental stress analysis..... 189
Photoelastic study of maximum tensile stresses in simply supported short beams under central transverse impact (D)..... 305
Photoelastic study of strain waves caused by cavitation (D)..... 298
Stress distributions around hydrostatically loaded circular holes in the neighborhood of corners..... 178

DYNAMICS
On the dynamical behavior of rotating shafts driven by universal (Hooke) couplings..... 47

E

EAGLE, H. A.
Direct method for determining Airy polynomial stress functions (D)..... 303
Uniformly loaded circular plates with a central hole and both edges supported (D)..... 157

EARTH SATELLITES
Torques on a satellite vehicle from internal moving parts..... 196, 287

ECKERT, E. R. G.
Comparison of experimental information and analytical prediction for laminar entrance pressure drop in ducts with rectangular and triangular cross sections..... 288

ELASTICITY. *See also* BEAMS, CREEP OF MATERIALS, DEFORMATION, PLASTICITY, STRESSES AND STRAINS, STRUCTURES, VIBRATION
Bending of an elastically restrained circular plate under normal loading over a sector..... 37,(D) 637
Contact stresses under combined pressure and twist..... 396
Displacement discontinuity in the elastic half-space..... 125
Displacement discontinuity on the interface of two joined dissimilar semi-infinite elastic solids..... 292
Effect of curvature on the Hertz theory for two circular cylinders in contact..... 122,(D) 638
Photothermoelasticity: an exploratory study (D)..... 307
Refined theory of elastic orthotropic plates..... 437
Spherical symmetry in the theory of elasticity..... 136
The wedge under a concentrated couple: a paradox in the two-dimensional theory of elasticity..... 575

ELECTRIC ANALOGY
High order accuracy in the solution of partial differential equations by resistor networks..... 17
Superharmonic oscillations as solutions to Duffing's equation as solved by an electronic differential analyzer (D)..... 315

EMSLIE, A. G.
Vibration of a string having a uniform motion along its length..... 347

EPSTEIN EQUATIONS. *See* SHELLS

ERICKSON, W.
Strain-aging, work-hardening, and inhomogeneous deformation in Armco iron after static and dynamic deformation..... 285

ERINGEN, A. C.
Response of a simply supported Timoshenko beam to a purely random Gaussian process..... 496

ESCH, ROBIN
Digital computer programming (BR)..... 320

ESSENBURG, F.
Experimental study of initial and subsequent yield surfaces in plasticity..... 201
On axially symmetrical plates of variable thickness..... 625

EXPLOSIVES
Comments on the cutting of metal plates with high explosive charges..... 184

F

FANS
Ducted fan design theory..... 325

FAZEKAS, G. A. G.
Some basic properties of shoe brakes...7, 635

FEND, F. A.
Relief of thermal stresses through creep.. 589

FILTRATION
Physics of flow through porous media (BR)..... 320

FLAMES. *See* COMBUSTION, SPECTROSCOPIC ANALYSIS

FLETCHER, H. J.
Symmetrical buckling of a series of uniformly loaded parallel struts supported by spot connections to a long thin plate (D)..... 417

FLOW OF FLUIDS. *See also* COMPRESSORS, FANS, FLUID MECHANICS, HEAT TRANSFER, HYDRODYNAMICS
Comparison of experimental information and analytical prediction for laminar entrance pressure drop in ducts with

FLOW OF FLUIDS (*continued*)
rectangular and triangular cross sections ... 288
Effect of adverse pressure gradients on turbulent boundary layers in axisymmetric conduits (D) ... 159
Heat transfer in swirling laminar pipe flow ... 295
Jets, wakes, and cavities (BR) ... 319

GALLETLY, G. D.
Comparison of methods for analyzing bending effects in toroidal shells ... 413
General instability of ring-stiffened cylindrical shells subject to external hydrostatic pressure—a comparison of theory and experiment ... 259, 641
On particular integrals for toroidal shells subjected to uniform internal pressure ... 412

GATEWOOD, B. E. (author)
Thermal stresses (BR) ... 321

GAYDON, A. G. (author)
Spectroscopy of flames (BR) ... 323

GAYLORD, E. W.
Improvement of Holzer table based on a suggestion of Rayleigh's (D) ... 160

GEORGIAN, J. C.
Uniformly loaded circular plates with a central hole and both edges supported (AC) ... 158

GERARD, G.
Physical properties of plastics for photothermoelastic investigations ... 525

GERE, J. M.
Coupled vibrations of thin-walled beams of open cross section ... 373

GILBERT, ROBERT
Two-dimensional, steady, cavity flow about slender bodies in channels of finite breadth (AC) ... 156

GLASSTONE, SAMUEL
Nuclear engineering (BR) ... 163

GODED, F.
Spherical symmetry in the theory of elasticity ... 136

GOGLIA, M. J.
Laminar flow in a uniformly porous channel ... 613

GOODIER, J. N.
Direct method for determining Airy polynomial stress functions (D) ... 301
Pitch and curvature corrections for helical springs ... 466
Theory of pitch and curvature corrections for the helical spring—I (tension) ... 471
II (torsion) ... 484

GOODMAN, L. E.
Effect of finite rotations on gyroscopic sensing devices ... 210
Thermal drift of floated gyroscopes (AC) ... 633

GOODMAN, T. P.
Velocity and acceleration analysis of plane and space mechanisms by means of independent-position equations (D) ... 636

GRABBE, EUGENE M.
Automation in business and industry (BR) ... 323

GRANULAR MEDIA. *See* SPHERES

GRAPHICAL METHODS
Redundant trusses of elastic-strain-hardening material ... 233
Some basic properties of shoe brakes ... 7,(D) 633

GYROSCOPES
Effect of finite rotations on gyroscopic sensing devices ... 210
Kinematic drift of single-axis gyroscopes ... 357
Thermal drift of floated gyroscopes (D) ... 632

H

HACKEWITZ, F. W. v.
Influence of Kapitsa's viscosity on the hydrodynamic lubrication of a cylindrical roller bearing as affecting contact pressure and oil-film thickness ... 620

HAENER, JUAN
Formulas for the frequencies including higher frequencies of uniform cantilever and free-free beams with additional masses at the ends ... 412

HAGEL, W. C.
Specific damping energy of fixed-fixed beam specimens (AC) ... 152

HAGG, A. C.
Elastic and damping properties of oil-film journal bearings for application to unbalance vibration calculations ... 141

HAMMITT, F. G.
Axial-temperature-gradient bending stresses in tubes ... 109

HANSON, K. L.
The sector problem (AC) ... 317

HARVEY, T. J.
Natural forcing functions in nonlinear systems ... 352

HATSOPOULOS, G. N.
Analysis of the thermoelectric effects by methods of irreversible thermodynamics ... 428

HAYTHORNTHWAITE, R. M.
Strength of materials (BR) ... 322

HAYWOOD, J. H.
Strain-energy expression for thin elastic shells ... 546

HEAPS, H. S.
Symmetrical buckling of a series of uniformly loaded parallel struts supported by spot connections to a long thin plate (AC) ... 417

HEAT TRANSFER
Effect of magnetic field on forced convection heat transfer in a parallel plate channel ... 415
Heat transfer. Volume II (BR) ... 321
Heat transfer in swirling laminar pipe flow ... 295
Introduction to fluid mechanics and heat transfer (BR) ... 644
Transient conduction in a semi-infinite solid with variable thermal conductivity ... 146

HERRMANN, G.
Axially symmetric motions of thick cylindrical shells ... 97

HESS, R. L.
Transient thermal stresses by an analogy ... 627

HETÉNYI, M.
Contact stresses under combined pressure and twist ... 396

HIJAB, W. A.
Statistical appraisal of Prot method for determination of fatigue endurance limit (AC) ... 157

HIRSCHHORN, J.
Synthesis of a four-bar mechanism for prescribed extreme values of the angular velocity of the driven link ... 349

HODGE, P. G., JR.
Carrying capacity of an elastic-plastic cylindrical shell with linear strain-hardening ... 79
Interaction curves for shear and bending of plastic beams (AC) ... 305
Torsion of cylindrical and prismatic bars in the presence of steady creep ... 214

HOLL, J. W.
Effect of adverse pressure gradients on turbulent boundary layers in axisymmetric conduits (AC) ... 159
